

NAVEEN VIJAYARAGHAVAN

Site Reliability Engineer / Application SRE

Sunnyvale, CA | (916) 303-6791 | naveraag@gmail.com | linkedin.com/in/naveen-v-raghavan

Certified Kubernetes Administrator | Application SRE | Middleware Operations | Automation | Production Reliability

PROFESSIONAL SUMMARY

Certified Kubernetes Administrator and AWS Cloud Practitioner with 16+ years of enterprise application operations, production support, automation, data migration, and reliability experience across Apple IS&T, Target, Ascena Retail, AC Nielsen, and Eli Lilly. Strong fit for Application SRE and Site Reliability Engineering roles requiring incident response, observability, release readiness, REST/API troubleshooting, performance tuning, and high-availability operations.

CAREER IMPACT HIGHLIGHTS

- Supported Apple IS&T enterprise middleware and publishing systems with emphasis on availability, launch readiness, operational stability, and cross-functional issue resolution. Effort reduction analysis and achievement of over 40%
- Maintained production flows transferring 1TB+ data daily through monitoring, alerting, incident triage, recovery procedures, escalation management, and post-incident follow-up.
- Improved operational efficiency through automation, scripting, proactive detection, GET request-response analysis, REST/API debugging, Splunk investigation, and ServiceNow-driven workflow control. TAT reduction achieved over 30%
- Hands-on technical base across Linux/Unix, Shell, Python, Oracle SQL/PLSQL, Git, Postman, Ansible, AWS fundamentals, Kubernetes fundamentals, JSON, XML, and enterprise middleware support.

CORE SKILLS

Reliability / Operations: Site Reliability Engineering; Application SRE; production support; incident management; RCA; problem management; MTTR reduction; release validation; high availability; SLA support

Observability / Tools: Splunk; ServiceNow; monitoring and alerting; log analysis; ticket analysis; production dashboards; proactive detection; support automation

Technical Stack: Kubernetes; AWS; Linux/Unix; Shell scripting; Python; Oracle SQL; PL/SQL; REST APIs; JSON; XML; Postman; Git; Ansible; VSCode

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) | AWS Certified Cloud Practitioner | AWS Academy Graduate - Cloud Architecting | ITIL Foundation

PROFESSIONAL EXPERIENCE

Team Lead, AOS Publishing Systems - Operations and Support | Tata Consultancy Services | Client: Apple Inc., IS&T | Sunnyvale, CA

Dec 2025 - Present

- Lead operations and support for Apple publishing systems supporting multi-channel and multi-platform content publishing environments.
- Partner with engineering, product, and support teams to improve caching, data architecture, revision management, release readiness, and launch stability.
- Use GenAI-assisted troubleshooting and code analysis to accelerate investigation of application issues, REST/API defects, production anomalies, and workflow failures.

Team Leader, Application Production Support / Middleware SRE | Tata Consultancy Services | Client: Apple Inc., IS&T | Sunnyvale, CA

Nov 2016 - Nov 2025

- Engineered proactive monitoring and alerting for enterprise middleware transferring 1TB+ data daily, helping sustain high availability across critical production workflows.
- Automated incident detection and operational workflows using scripting and support tooling, reducing manual effort and improving recovery speed.
- Tuned CPU, disk, kernel, and application parameters to improve utilization, throughput, reliability, and scalability.
- Handled release validations, production checks, REST API debugging, GET request-response analysis, Splunk log review, ServiceNow tickets, cross-team escalations, RCA, and problem follow-up.

Data Migration, Database Engineering, and Application Support Roles | Tata Consultancy Services | Clients: Target, Ascena Retail, AC Nielsen, Eli Lilly | India, France

Jan 2009 - Oct 2015

- Held progressive roles across Target, Ascena Retail, AC Nielsen, and Eli Lilly covering application support, transition, database engineering, data migration, incident handling, defect prevention, and production-status governance.
- Developed and tested Oracle stored procedures, transformation logic, source-to-target data mapping, technical designs, functional specifications, test cases, transition documents, and service improvement plans.

PERSONAL AI PROJECT

Built n8n automation workflows and a Supabase Vectorstore/RAG chatbot to convert unstructured daily progress reports from Google Docs into structured, searchable project data.

CLIENT / DOMAIN EXPOSURE

Apple Inc. IS&T - publishing systems, middleware operations, launch and release support; Target Corp. - accounts payable data migration; Ascena Retail - retail database engineering; AC Nielsen - Retail Measurement Systems; Eli Lilly - healthcare and clinical data management application support.

EDUCATION

Bachelor of Technology in Bioinformatics - VIT University, Vellore, India
